Software / firmware development / 3D graphics

Misc

1996 - 2003

Various professional and amateur experiences:

- C++ development in Sun Solaris environment;
- implementation in C++ of a video codec in H.263 standard, for Telecom Italia on PocketPC handhelds;
- development of management modules in C++ for e-learning systems;
- Java development on the Avvocatura dello Stato information system at Finsiel S.p.a., Rome;
- Java development on Web / Enterprise applications (JavaBeans, Java Server Pages, Servlets);
- teacher/trainer for IT laboratory;
- firmware development on handheld devices for data entry, application development in Windows environment (Alenia S.p.A. / Italgas S.p.A.);
- amateur game programming experiences in AmigaOS and Windows environments (3D developer and graphic designer);
- creation of management software for gyms (MS-DOS);
- automation of lighting effects for discos;

LANGUAGES

English, good command of reading and writing, less in speaking. Good listening comprehension.

BIO

I have been involved in software development since 1995. Since then, all my training and work experience have been in the IT sector. I deal with software not only as a profession, but also as a hobby, and for pure entertainment. Thanks also to the OpenMakersItaly Association, which I helped found, I love to spread the creative and conscious use of technology through events and training courses aimed at adults and childs.

EDUCATION

SELF TRAINING

📅 2003 - today

I study and update myself continuously. In recent years I have developed in-depth knowledge in various programming and scripting languages, specializing in development on GNU/Linux operating systems, on embedded and mobile systems, in the development of web-based infrastructures, as well as in the development of firmware for microcontrollers, and in technologies used in the infrastructures of game development and multimedia sector

CAMPANIA REGION

AIFA TRAINING COURSE

📅 2001 - 2002

AIFA Campania Region training course, aimed at hiring by the company ITSoft (ITS S.p.A. group). Topics covered: C, C++, Java programming, DBMS use (SQL), programming in UNIX environments.

STATE UNIVERSITY OF SALERNO

BACHELOR'S DEGREE IN COMPUTER SCIENCE

📅 1995 - 1997

uncompleted course of study

TECHNICAL STATE HIGH SCHOOL

INDUSTRIAL CHIEF TECHNICIAN DEGREE

📅 1990 - 1995

Computer Science Specialization

SOFT SKILLS

Excellent communication and technical dissemination skills, gained through professional experience in public events and direct training.

Excellent teamwork skills, both in person and remote working.

Good organizational skills developed over the years while participating in multiple work groups.

PROJECTS

Various projects (even non-software) visible on my github accounts:

<https://github.com/ultimostante/>

<https://github.com/startupsolutions>

PERSONAL EXPERIENCES

personal home automation and IoT projects;

reprogramming / modification / reuse of commonly used and commercial equipment for purposes other than the original ones, and use of the same in the creation of more complex systems;

since February 2014 I have been President of the association **"Open Makers Italy"**, of which I am the founder and promoter. The association deals with spreading technology and its conscious use through training courses and events, realizing projects born within it (on the proposal of the members) and providing support to companies and third parties in the realization of external projects.
